

Hanna Shyliaieva

Senior UX/UI Designer

Email: gannashilyaevacassandra@gmail.com

Telegram: t.me/Ganna_designer

LinkedIn: linkedin.com/in/hannashyliaieva

Portfolio: kreobuddha.github.io/ganna-portfolio

UX/UI designer with 10+ years of experience in enterprise software, internal tools and digital products. Strongest in complex interfaces — data-dense tables, filters, access control, admin panels and dashboards — and in the information architecture behind them. Built design systems from the ground up, led designers on multi-product projects, and worked directly with development teams through handoff and review.

Location: Tbilisi, Georgia (UTC+4) • Ukrainian citizen

Work setup: Available worldwide as an independent contractor — registered sole proprietorship in Georgia, able to invoice international clients directly, or via an EOR. No employer sponsorship required.

Professional experience

February 2026 — Present • Tbilisi **Freelance — Senior UX/UI Designer**

- Sole designer on an e-commerce product for a Netherlands-based children's toy marketplace: UX, UI and the interface system, working directly with the development team.

August 2022 — January 2026 **Consolware GmbH, Berlin — Lead UX/UI Designer (contract)**

- Led design for international clients across web applications, mobile products and digital platforms: research, information architecture, interface design, prototyping and branding.
- Ran the design side of Resola, a US healthcare startup, from concept to a funded product.
- Delivered the redesign of Digital Tower, an enterprise operations platform in daily use at Service-Telecom Group.
- Directed other designers on project work and reviewed their delivery.

June 2019 — August 2022 **GMCS Verex LLC, Moscow — Lead UI/UX Designer**

- Designed enterprise web applications and internal systems for large corporate clients, working in teams of three to five.
- Delivered five internal applications for Leroy Merlin — price monitoring, inventory accuracy, department management and HR floor maps — embedded on site with their in-house team.
- Created corporate websites, brand guidelines and supporting materials.
- Won repeat business: several major clients chose the company on the strength of the design work.

February 2017 — June 2019 **SprintSoft LLC, Tula — UI/UX Designer → Senior UI/UX Designer**

- Designed web applications and websites; promoted to Senior within the first two years.
- Created visual identities and brand guidelines.

October 2016 — February 2017 **R-Soft LLC — Designer**

- Designed web applications and websites; developed branding and visual identity systems.

October 2015 — February 2016 **Laboratory 24 LLC — 2D Designer → Head of 2D Design**

- Designed interfaces for 3D applications; managed the 2D design team after promotion.

Selected projects

Resola

Healthcare, US market • Lead Product & UX/UI Designer • 2021—2026

(via **GMCS Verex**, then **Consolware**) Home rehabilitation platform for stroke survivors: patients do sensor-guided exercises at home while clinicians monitor progress remotely. Designed the entire product — 20+ screens in the patient app, a clinician workspace of comparable scale, the marketing site and the brand. Directed the designers on the project, ran sensor integration end to end with the hardware vendor, and tested with real post-stroke patients. Taken from concept to secured funding, a clinic-network partnership and a second release.

Digital Tower

Service-Telecom Group • UX/UI Designer • 2025—2026

(via **Consolware**) Redesign of the enterprise platform the company runs its infrastructure operations on. Rebuilt six product areas and 20+ screens, simplified overloaded forms and removed redundant steps, and created the new visual language — without disrupting the workflows staff rely on.

Leroy Merlin

Retail • UX/UI Designer • 2019—2021

(via **GMCS Verex**) Five internal web applications used daily by store teams across the chain. Worked on site, embedded with their in-house design and marketing teams. Engagement renewed across several years and successive projects.

U&CO

Music services marketplace • Founder & Lead UX/UI Designer • 2023—2024

Defined the business model and the full process architecture before any screens: five roles and every path an order can take between them, including the failure paths. Designed the vetting, escrow and dispute flows. Prototype delivered; paused pending funding.

LoveBerry

Dating app, iOS & Android • UX/UI Designer • 2021

B2C app built around what people are doing tonight rather than a swipe deck. Designed end to end for both platforms, with monetisation built into the flow.

Skills

- Complex enterprise interfaces — tables, filters, access control, admin panels, dashboards
- Information architecture and user flows
- Design systems: built from scratch, documented and maintained
- Research: user interviews, usability testing, surveys, analytics review
- Accessibility: contrast, sizing, keyboard navigation
- Working directly with developers — handoff with states documented, front-end review
- Leading designers on multi-product projects
- Branding and visual identity

Tools

Figma • FigJam • Adobe Photoshop • Adobe Illustrator • Miro • Zeplin • Framer • Tumult Hype • Claude • ChatGPT • Figma AI

Languages

Ukrainian — Native • Russian — Native • English — B2

Education

September 2011 — June 2015
Tula State University — Degree in Design

Selected clients

Decathlon • Leroy Merlin • KFC • SOCAR Energy • Skolkovo Innovation Center • Russian Football Union • Transneft • Prisma • Resola • Service-Telecom Group

All delivered through employers, 2018—2026.

Note: Many of the products I designed are internal enterprise tools under confidentiality agreements and cannot be shown publicly. The portfolio holds what can be shared; further work can be walked through during the interview process.
