LETTER OF RECOMMENDATION

To Whom it May Concern,

I am pleased to recommend **Hanna Shiyliaieva**, who worked at **GMCS** for several years and became an important member of our design team during that time.

Ganna joined the company as a Designer and, through her consistent work and professional growth, progressed to the position of **Senior UX/UI Designer**. Throughout her time at GMCS, she demonstrated a high level of responsibility, strong communication skills, and the ability to successfully manage increasingly complex design tasks.

During her time at GMCS, Ganna contributed to numerous enterprise software projects for some of our largest clients, including **Leroy Merlin, Decathlon, Transneft, SOCAR Energy, KFC, the Skolkovo Innovation Center, the Russian Football Union (RFU), Prisma, Service-Telecom Group**, and many others. Working with organizations of this scale required not only strong design skills, but also the ability to understand complex business processes, collaborate with multidisciplinary teams, and consistently deliver high-quality solutions within established timelines.

Her role involved close collaboration with business analysts, developers, project managers, QA engineers, and clients. Ganna was able to quickly understand business requirements, communicate her design decisions clearly, and create practical, user-focused solutions that supported both user needs and project goals.

As her experience grew, she became someone we could confidently rely on for important projects. She worked independently, managed several projects simultaneously, organized her workload effectively, and maintained a consistently high standard of quality, even in fast-paced environments with changing priorities.

Ganna also contributed to the development of our design team by mentoring a design intern, helping them become familiar with our processes and providing ongoing guidance. She was always willing to share her knowledge and worked well with colleagues across different departments.

Over the years, Ganna earned the trust of both management and project teams through her professionalism, reliability, and collaborative approach. She consistently met deadlines, handled feedback constructively, and maintained positive working relationships with everyone involved in the projects.

I believe Ganna has all the qualities needed to succeed as a **Senior UX/UI Designer, Senior Product Designer, or Lead Product Designer**. She combines solid design expertise with a strong sense of ownership and a thoughtful approach to teamwork. I am confident she will be a valuable addition to any organization.

I would gladly recommend her without reservation.

Sincerely,
N.N. Zakurdaev
General Director
GMCS
