LETTER OF RECOMMENDATION

To whom it may concern,

I had the pleasure of working with **Ganna Shiliaeva** during the development of **Resola**, a healthcare startup. Ganna joined the project at an early stage and led the design direction from the very beginning.

Her role went far beyond UX/UI design. Alongside designing the product experience, she helped shape the visual identity of Resola across multiple areas, including branding, marketing materials, landing pages, 3D assets, and video content. Having one person oversee these different parts of the design process helped us keep everything consistent as the product evolved.

One thing I especially appreciated was that Ganna didn't wait for detailed instructions. She was comfortable working in an environment where many decisions were still being made and often helped the team move forward by proposing thoughtful solutions. She understood how to balance user needs, business goals, and technical constraints without overcomplicating the process.

She was organised, reliable, and easy to work with. Communication was always straightforward, deadlines were met, and I knew I could trust her with important parts of the product without needing constant supervision.

Looking back, Ganna played an important role in helping Resola grow from an idea into a coherent product and brand. I would be happy to work with her again and confidently recommend her to any company looking for a strong Product or UX/UI Designer.

Sincerely,

Matt Stevens

Co-Founder & Scientific Director
